and

completed,
back onto

Instant Problem Solving

No Syrup

- 1) Check contents of bag in box.
- 2) Check contents of CO2 bottle.
- 3) Check all boxes are connected correctly.
- 4) Check change over valve (if fitted) has activated.

Flat Warm or Still Product

- 1) Check contents of CO2 bottle, change if empty.
- 2) After changing CO2 bottle draw through at least eight pints of soda water from each tap or until normal flow is achieved.

- 3) Check cooler is switch on, pumps are running and ensure cooler has an icebank.
- 4) If poured drink froths up in glass then goes flat, it is reacting to the cleaning agent. Change cleaning agent.

- 5) If no drinks have been poured that day, then pour carbonated water through the system until it runs cold.
- 6) Never pour cold drinks into a warm glass

Syrup only no carb water

- 1) Check stopcock is turned on fully and that carbonator is plugged in and switched on.
- 2) Check mains supply.
- 3) Check carbonator is switched on. To reset carbonator cycle switch off at

- 4) Check CO₂ bottle is connected and full.
